

Yes! I want to participate in the Evergreen renewable energy program.

Please sign me up at the following level:

- | Number of blocks* of energy: | Amount added to my monthly energy bill: |
|---|--|
| <input type="checkbox"/> 1 block (100 kWh)..... | \$1.50 |
| <input type="checkbox"/> 2 blocks (200 kWh)..... | \$3.00 |
| <input type="checkbox"/> 3 blocks (300 kWh)..... | \$4.50 |
| <input type="checkbox"/> 4 blocks (400 kWh)..... | \$6.00 |
| <input type="checkbox"/> 5 blocks (500 kWh)..... | \$7.50 |
| <input type="checkbox"/> ___ blocks. (If more than 5 blocks at \$1.50 per block are desired, specify the number of blocks in the space provided.) | |
| <input type="checkbox"/> Please provide me with more information. | |

I understand that this amount is in addition to my monthly energy bill.

*** One block of 100 kWh represents about 10% of the average residential monthly electric usage (1,000 kWh).**

**You have a
choice for
the future.**

**and it's
renewable.**

Evergreen is a voluntary renewable energy (green power) program available to your home, farm or business through your local Touchstone Energy Cooperative, a member-cooperative of the Dairyland Power System.

Evergreen is for those who want to support renewable energy and are willing to help pay for the extra costs associated with its production. In addition to your normal monthly electric bill, you volunteer to pay a small, additional charge each month to offset the additional cost it takes to support renewable energy generation. Your investment in Evergreen results in the generation of renewable energy above and beyond state requirements.

Evergreen renewable energy comes from the wind and waste-to-energy sources such as landfill gas and livestock manure. We purchase energy produced from highly-efficient wind turbines. Waste from landfills and livestock confinements is converted to bio-gas that is used to generate renewable electricity.

By participating in Evergreen, you are investing in the future of the environment for your children and grandchildren. As our investment in renewable energy generation increases, it helps us conserve our fossil fuel resources such as coal and natural gas for the future.

Your purchase of one 100-kilowatt hour (kWh) block of Evergreen renewable energy each month for one year has the same environmental benefit (CO₂ reduction) as planting one-half acre of trees or not driving a car 2,400 miles. (source: EPA)

For more information about Evergreen and our commitment to renewable energy, contact your local Touchstone Energy Cooperative.

**Your energy choice
for their future.**
